Tekes supports collaborative R&D projects

- 1) Tekes has **open calls** for all mentioned programmes every year:
 - In these calls, Tekes finances collaborative projects between research institutes and companies.
 - International co-operation is appreciated and expected.
 - Tekes can finance only Finnish organisation but in some cases sub-contracted research from abroad is possible.

- 2) **Companies** can submit applications to Tekes at **any time point** in any theme or topic:
 - **Research institutes** can participate **as subcontractors** in these applications OR create **a bilateral application** that benefits the company driven project and that is smaller in size.
 - International co-operation is appreciated and expected.
