

BBSRC-FAPESP JOINT PUMP-PRIMING AWARDS for AMR and INSECT PEST RESISTANCE IN AGRICULTURE: *Understanding and managing resistance, including novel methods, for pathogen and pest control.*

**DISCUSSION SESSIONS - Current state of knowledge: Where are we now?
What do we know (and not know)?**

The following questions are provided as a starting point for discussion. Please capture a summary of your discussion on the paper provided.

- What are the UK/Brazil strengths/capabilities that underpin the component research areas just discussed?
- What existing activities are there?
- Where are our key knowledge gaps, particularly those which are inhibiting a step-change in understanding/approach?
- What data/resources are currently available and how widely accessible is it?
- Which areas do we have sufficient understanding to drive forward more applied research?
- Any particular areas which would be ideal for proposals to this call?
