Mobility Group

- Mobility indicators:
  - Data fusion (loop detectors, GPS, OD surveys, smartcards, fieldwork studies)
  - BRT comparisons, metrics on GPS traces and SmartCard for São Paulo city, like ex: reliability (travel time)
- Better Concepts of Service Level / performance indicators:
  - Going in and out
  - Jerking / Bunching
  - Comfort (e.g. seats, crowding)
- Use of GPS traces for transit priority
- Long term goals
  - Demand / Traffic models
  - Economic appraisal
